## **UV Resources Becomes an Approved Provider of Continuing Education Courses for Florida Board of Professional Engineers**

### **Course Offers Licensed Professional Engineers Strategies to Create Cleaner, More Energy Efficient HVAC/R Systems**

SANTA CLARITA, CALIF. (March 14, 2018) — The Florida Board of Professional Engineers (FBPE) has approved UV Resources as a Continuing Education Provider for the organization, which regulates the practice of engineering in the state.

The free one-hour training course offered by UV Resources is titled “How UV-C Can Reduce HVAC Energy, Maintenance Costs and Improve IAQ” and offers an overview of the various benefits ultraviolet germicidal energy provides commercial HVAC/R systems.

As an approved training provider, UV Resources will offer coursework for the professional organization’s 41,000 active licensed engineers in the state of Florida. Licensed PEs in Florida are required to complete 18 hours of continuing education during each registration period in order to maintain their professional credentials.

The CEU course explores ASHRAE’s findings about how the UV-C wavelength is used to not only kill microbial contaminants, but how it also improves, maintains and assures A/C system performance while reducing system maintenance and energy consumption.

“Widely embraced in the 1990s to improve indoor air quality, many engineers now recognize UV-C as a proven means of keeping HVAC systems running optimally and cost-effectively,” says Dan Jones, president of UV Resources.

A new training course will help professional engineers learn more about Ultraviolet-C energy’s effectiveness in HVAC/R applications.

-more-

There is no charge for the course, which can be delivered in person by trained UV Resources representatives.

Local ASHRAE chapters or trade organizations across the country can request this specialized training, by contacting Dean Saputa at [dean.saputa@uvresources.com](mailto:dean.saputa@uvresources.com).

## ABOUT UV RESOURCES

UV Resources (UVR) is a leader in the education, design and innovative engineering of affordable ultraviolet-C equipment for a variety of commercial, healthcare, government and residential HVACR applications. In addition to developing new and unique UV products for specific applications, UVR team members were among the first to properly apply UV energy in air conveyance systems of all types. UVR is an active member of ASHRAE, Illuminating Engineering Society (IES) and the International Ultraviolet Association (IUVA). For more information, call 877-884-4822; or visit [www.UVResources.com](http://www.UVResources.com).
